Capless

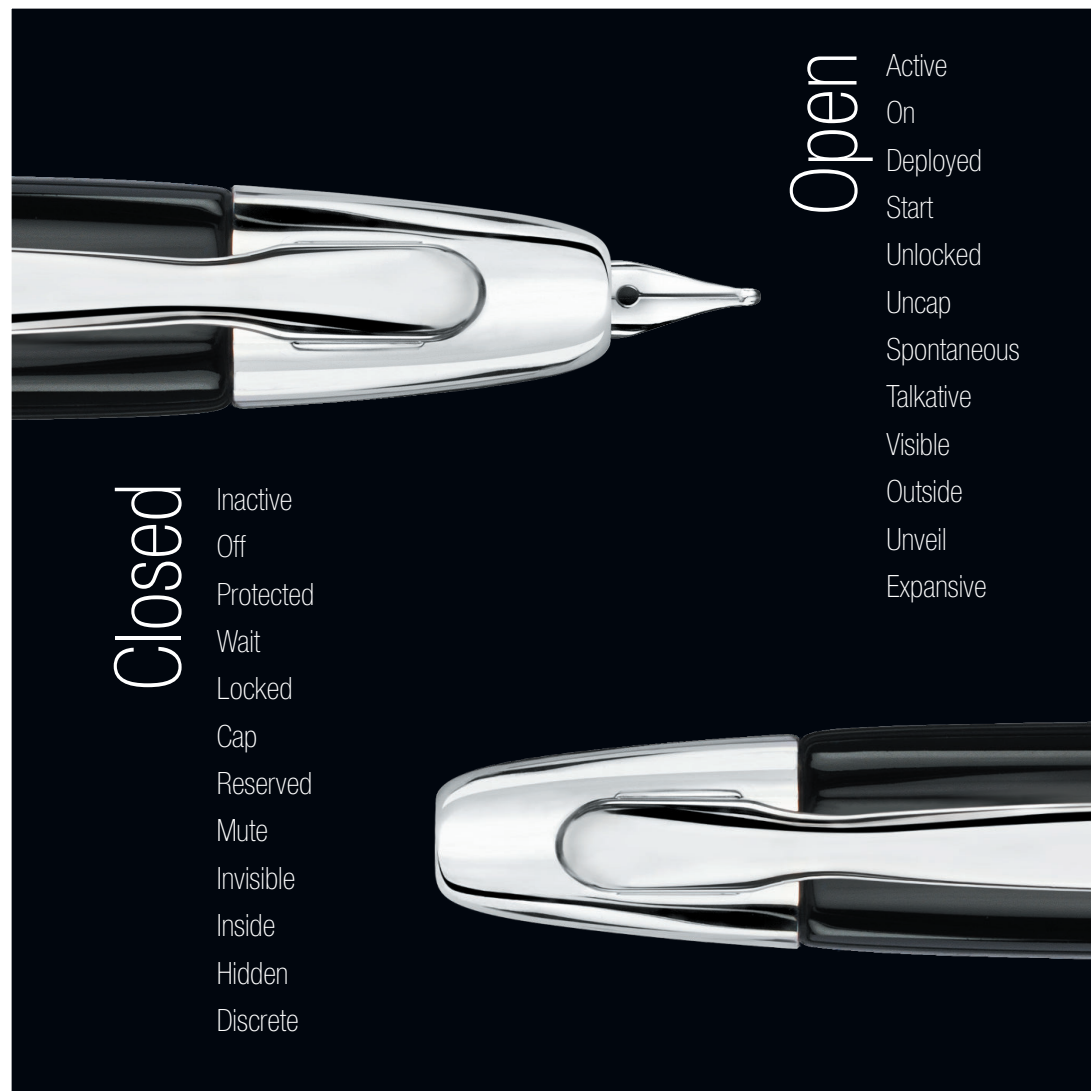

Capless

A unique pen, at the forefront of technology

The Capless is born in 1963 in Japan and its retractable version in 1964 for the Olympic Games in Tokyo. This fountain pen allows you to write with the same hand, without a cap. Now mythical, it won the high-tech award in 1965 and has since conquered the world and all those who love to write with a Japanese quality pen.

A unique pen, that resembles yourself

Its retractable 18 Karat gold nib is a patented system, including a protective shutter that prevents ink from ever leaking or drying out, making it unique. This revolutionary pen offers practicality, finesse and elegance in more than 30 finishes to seduce every type of writing.
